Release Highlights

Dear Educators,

We're pleased to share the **NextOS June** release updates.

We're continuously working to make NextOS better—so you can accomplish tasks more easily, make smarter decisions, and breeze through your daily work.

These release notes will keep you informed, help you explore new features, and ensure you're getting the most out of what's new.

You can always access these updates directly from your NextOS login:

Left Menu > Help Icon > What's New in NextOS

Please find below some of the highlights of this release.

01

Smart Group for Transport Routes

- Auto-creates a Chat Group for a route-service with the parents of all mapped students, driver, attendant, and transport in-charge, with membership refreshing daily.

[know more...](#)

02

Higher File Size Support in Email Compose

- File Size limits for email attachments have been relaxed — larger files now send as download links valid for 1 year, with no cap on file count.

[know more...](#)

03

Chat & SchoolFeed Analytics

- Now includes Chat & School Feed analytics, giving clear insight into usage, reach, and engagement.

[know more...](#)

04

Staff Module Integration in Forms

- staff module integration - you have changed the main content - but highlights still talk about adding them as recipient

[know more...](#)

05

Student Edit History

- Complete audit log can be viewed for each of the student record changes, showing old → new values, timestamp, and who made the change

[know more...](#)

New Features

We've rolled out exciting new features to give you more control and flexibility in managing your day-to-day work on NextOS.

1. Communication

1.1 Chat - Smart Group for Transport Routes

What's New: A new "Route – Service" Smart Group type auto-creates a chat group with all parents of mapped students, the driver, attendant, and transport in-charge for that route. Membership refreshes daily.

Benefit: Ready-made, always up-to-date communication group per transport route for trip updates.

Locate: Communication > Chat > Smart Group > Route – Service

← Smart Group
Route – Service

Create groups that allow staff to interact with all parents associated with their transport services. Select a service to enable the group. Deselect it to disable the group. Group members will be auto-added and refreshed every day.
Note: (*) indicates an archived group.

Routes	Services
☐ NextRoute	☐ R76 S11
☐ Mohan	☐ R06 S55
☐ BANJARA HILLS TO YOUSUF GUDA	☐ R1 S1
☒ Next Education Pvt Ltd	☒ R3 S01

1.2 Chat while you Track

What's New: Chat Quick Links on the Tracking, Route, and Vehicle pages open the respective transport Smart Group chat directly for both parents & transport incharge/admins.

Benefit: Jump into the relevant group chat from wherever transport is already being managed, without switching to Communication separately.

Locate: Transport > Trip Management / Route Page / Vehicle Page / Live Vehicle Status

1.3 File Size restriction removed for Email Attachments

What's New: Attachments over 7MB are now sent as download links (1-year validity) with no cap on file count.

Benefit: Send circulars or announcements with larger or more attachments without hitting size limits.

Locate: Communication > Mailbox > Compose

1.4 Chat & SchoolFeed Analytics

What's New: Two new dashboards — Chat and School Feed — added to the Communication Dashboard, with date-range filters and previous-period comparison. Chat covers growth, activity, and group types; School Feed covers posts, audience reach, engagement, and top tags.

Benefit: A single, detailed view of engagement across Chat and SchoolFeed alongside existing channels.

Locate: Collaboration > Communication > Communication Dashboard > Chat / School Feed tabs

1.5 Expanded File Type Support in Chat

What's New: Chat now accepts PDF, XLSX, XLS and other document formats as attachments, in addition to images and videos.

Benefit: Share a wider range of documents directly in Chat without switching to email.

Locate: Communication > Chat

1.6 SchoolFeed Settings

What's New: A toggle controls whether staff can post to all recipients (Admin/Principal always have full access). A separate setting lets admins choose which staff roles see every SchoolFeed post without being explicitly tagged.

Benefit: Finer control over who can broadcast on SchoolFeed and which roles get full visibility into staff communication.

Locate: Settings > Communication > SchoolFeed Settings

2.1 Fee Collection Report Enhancement

What's New: An "Include" filter with Fee, Inventory, and Admission checkboxes lets users choose which modules to pull collection transactions from.

Benefit: Generate module-specific collection reports instead of all transaction types mixed together.

Locate: Finance > Fee > Fee Reports > Fee Collection Report

← Fee Collection Report

The report allows customization through filters such as collection type, class, section, payment modes, and fee categories, it also offers options to display concessions, inventory data, and fee type breakdowns for a comprehensive overview

2.2 Multi-Select for Concession Approval

What's New: Bulk approval is now possible for Concession Requests — multiple students can be approved in one action. Expanding a request via View shows fee/concession details, approval history, or rejection reason depending on the tab (Pending/Approved/Declined).

Benefit: Review and approve multiple students' concessions in one shot instead of opening each request individually.

Locate: Finance > Fee > Concession Approval

← Fee Concession

3. Staff

3.1 Automate Staff Data Collection

What's New: Forms can now integrate with the Staff module to automate data collection. Admins build a form, add fields (including custom Text Fields like Father/Mother Name if needed), link it to Staff under Integration, and share it with selected staff or departments. Staff fill it out via **Messages** → **Forms** on the mobile app, and responses sync automatically to the Staff List..

Benefit: Avoid the double work, Collect Staff 360 details directly from Staff

Locate: Staff > Forms > Select Recipients

Staff

Filter: Search Staff Department: All

Search: mani

Search List	Selected List
 Arjun Kapoor Emp ID : STF102	
 Sneha Reddy Emp ID : STF145	

Cancel Done

4. Admission

4.1 Manage Admission - Custom Fields Filter

What's New: A "Search By Custom Field" option lets users filter students by custom field values (e.g. previous school, state of birth) at any admission stage, including Confirmation.

Benefit: Group and process large volumes of admissions in bulk instead of opening each record individually.

Locate: Admission > Manage Admission > Search By Custom Field

The screenshot shows the 'Manage Admission' interface. At the top, there's a progress bar with stages: 3 Registration, 4 Evaluation, and 5 Confirmation. A banner at the top says 'To configure the admission for next academic year - Click here'. Below the progress bar, there are filters: 'Lead Generated By' (All), 'Students assigned to me' (toggle), and 'Status' (All). A table lists students with columns: 'e & Class', 'Year', 'Contact Name', and 'Mobile No. / Email'. The table contains four rows of student data. A modal titled 'Search By Custom Field' is open, showing 'Choose entity' and 'Choose Field name' dropdowns, and 'Clear' and 'Search' buttons.

e & Class	Year	Contact Name	Mobile No. / Email
	2026-2027	Ramesh Sharma	9876543210
	2026-2027	Suresh Malhotra	9123456780
	Current Ay	Anita Iyer	9988776655
	2025-26	Vikram Nair	9012345678

5. School Setup

5.2 Custom Date Format for Printables

What's New: Date fields on printable templates (TC, ID Cards, reports) can now be set to a custom format — e.g. dd/MM/yyyy, dd-MM-yyyy, yyyy-MM-dd — chosen from the template editor with a live preview.

Benefit: Match date formatting on printed documents to the school's own convention.

Locate: Settings > School Setup > Printable Templates > Edit Template

[illegible]

6.Student

6.1 Student Edit History

What's New: A new Edit History section (accessible from Student List and Student 360) shows a filterable log — Timestamp, Action Type, Student ID/Name/Class, Changed Fields (old → new), and who made the change. A "+X more field(s) changed" link expands entries with several changes.

Benefit: Complete, filterable audit trail of student record changes in one place.

Locate: Student > Student List / Student 360 > Edit History

7. Calendar

7.1 Mobile App – Events View

What's New: A new "Events" tab on the Mobile App calendar lists all events for the academic year in a single scrollable view, grouped by date.

Benefit: Quick, at-a-glance view of the full year's events without navigating day by day.

Locate: Mobile App > Calendar > Events

8.Inventory

7.1 Inventory - Sales & Issue - Date Restriction

What's New: School can configure the time window(Days Before / Days After Today) to restrict how far back or forward Sale and Issue entries can be dated, independently for each flow.

Benefit: Help schools to prevents misuse of cash handling through backdated sales entries.

Locate: Inventory > Settings > Entry Date Controls

Define the allowable date range for sales and issue entries. Users can only create entries within the configured days before and after the current date.

Sales Entry

Date on sales invoices and sales vouchers.

Restricted ☒

Days before today

-

1

+

How far back-dating is allowed. 0 : block back-dating.

Days after today

-

1

+

How far future-dating is allowed. 0 : block future-dating.

ALLOWED WINDOW TODAY

08 Jun 2026 → 10 Jun 2026

Rolls forward automatically each day - today is 09 Jun 2026

Issue Entry

Date on stock-issue and material-out notes.

No limit ☐

No date limit — users can record issue entries on **any date**.

NEW FEATURES

13

1. Payment Gateway

1.1 Improved Razorpay Split Transfer Flow

Improvement: Split transfer initiation for Razorpay payments has moved to the "Create Transfers From Orders" flow — the split transfer request is now part of order creation, instead of waiting for a successful payment response.

Impact: Improves reliability of split settlements and reduces settlement discrepancies, missed split transfers, and manual reconciliation effort.

Locate: Settings > Finance > Payment Gateway

2. Communication

2.1 Mobile App – Attachments in Inbox

Improvement: When a message in the Mobile App Inbox contains attachments, a blue notification bar — "X attachments · scroll down to view" — now appears at the top of the thread. Tapping it scrolls automatically to the Attachments section.

Impact: Makes it faster to locate and open attachments in long messages, without manual scrolling.

Locate: Mobile App > Communication > Inbox

2.2 Mobile App – Recipient List in Approval Screen

Improvement: The Mobile App Approval screen now shows a "Selected Recipients" panel — Parent, Staff, and Student tabs with counts, plus relation types (Father, Mother, Guardian, etc.) for parents. Live on Android now; iOS coming next week.

Impact: Lets approvers verify exactly who a message will reach before approving.

Locate: Mobile App > Communication > Approvals

3. Student

3.1 Search Student by Parent Name

Improvement: Searching by parent name — already available on the Collect Fee page — has now been extended to the Student List page, using the syntax "P.parentname".

Impact: Brings parent-name search to the Student List page, so staff can locate a student even when only the parent's name is known.

Locate: Student > Student List (search using "P.parentname")

3.2 Early Exit Requests Quick Link in Student 360

Improvement: A new "Early Exit Requests" quick link on Student 360 opens Visitor Management pre-filtered to that student's Exit tab. The old "Student Exit" link is now renamed "Initiate TC" to avoid confusion between the two.

Impact: Lets staff check a student's gate-pass history directly from Student 360, with clearer naming between exit requests and TC initiation.

Locate: Student > Student 360 > Early Exit Requests

4. Fee

4.1 Filters in Monthly Statement Report

Improvement: Academic Session and Student Status filters have been added to the Monthly Statement Report (Fee Reports). Report totals have also been corrected to match the totals shown in the Daily Fee Details Report.

Impact: Makes it easier to pull historical or session/status-specific fee statements, and ensures the Monthly Statement Report and Daily Fee Details Report stay consistent with each other.

Locate: Finance > Fee > Fee Reports > Monthly Statement Report

5. Examination

5.1 Commentary Remarks in Activity Rubric Report

Improvement: Commentary Remarks can now be downloaded inline with marks in the Activity Rubric Wise Mark List report. Users select CR Level(s) and Type(s) to include; supported levels vary slightly by report format.

Impact: Gives teachers a combined view of rubric marks and commentary in one export.

Locate: Student > Examination > Examination Reports > Activity Rubric Report

We've introduced targeted improvements across Attendance, Communication, and Transport to simplify day-to-day administrative tasks.

What's New:

1.1 Quick Mark Attendance – "Mark All as Present"

A new "Mark All as Present" option removes the earlier workaround of marking one student absent just to complete attendance on no-absentee days.

Locate: *Student > Attendance > Quick Mark | Ticket: 710150 | 17-Jun-2026*

1.2 Mailbox Overview Stats & Compose Improvements

Mailbox now shows Delivered/Pending/Failed percentage breakdowns per tab; Compose loads instantly and shows only mode-relevant, pre-approved templates (SMS/WhatsApp).

Locate: *Communication > Mailbox / Compose | Ticket: 711552 | 30-Jun-2026*

1.3 Transport Service Screen – Label & Payment UI Updates

"Modify" is now "View Details"; a new "Rectify Service Assigned & Effective Date" option lets users update transport/fee effective dates together; the redundant Delete option is removed and a View History button added.

Locate: *Student > Student Transport > Assign Transport Service | Ticket: 709000 | 4-Jun-2026*

Why it Matters:

These improvements reduce the number of screens administrators need to navigate, cut out unnecessary manual steps in daily attendance, give better visibility into message delivery, and make transport service management clearer and less error-prone.
